

Ary Vincench

Product Design Engineer

Design Systems · AI-Assisted Front-End · Product Strategy

avinroart@gmail.com · Madrid, Spain · avinro.com

PROFESSIONAL PROFILE

Product Design Engineer with 9+ years of experience in design and 5+ years building SaaS and multi-sided platforms from zero to production. I sit at the intersection of product strategy, interaction design, and front-end implementation — defining user journeys, owning design systems end-to-end, and closing the gap between Figma and code using AI-assisted workflows (Cursor, Claude, Codex).

Strong in zero-to-one environments and fast-moving product teams where design and engineering need to move as one.

WORK EXPERIENCE

helloDojo — Product Design Engineer — Lead

Nov 2025 – Present · Madrid / Ibiza / Remote

- Lead product definition and UX strategy across a multi-sided ecosystem including Customer App, Driver App, Vendor Portal, and Fleet Manager Portal.
- Translate business vision into structured product decisions, user journeys, operational workflows, edge cases, interaction models, and implementation-ready specifications.
- Defined and scaled a complete design system from scratch, including tokens, component libraries, documentation, usage standards, and AI-assisted design-to-code workflows.
- Drive AI-assisted front-end implementation using Cursor and Claude, validating production UI, reducing design-to-development gaps, and accelerating iteration cycles.
- Partner directly with engineering, QA, and business stakeholders to shape roadmap priorities and ensure product consistency across all customer-facing surfaces.
- Operate in a hybrid Product Design and Product Management capacity within a lean startup environment.

110 Theory — Senior Product Designer

Mar 2023 – Nov 2025 · Remote

- Led UX design initiatives for Baptist Health's mobile applications (iOS and Android), supporting activation, retention, and operational efficiency goals.
- Redesigned critical healthcare workflows, transforming complex administrative processes into intuitive mobile-first experiences.
- Designed Smart TV experiences deployed across hospital environments, optimizing accessibility, information hierarchy, and remote interaction patterns.
- Collaborated closely with product managers, engineers, operations teams, and researchers to define features that balanced user needs, business goals, and technical constraints.
- Produced high-fidelity prototypes, interaction specifications, and implementation-ready documentation that reduced ambiguity during development.
- Connected UX decisions to measurable business and operational outcomes through KPI-driven design discussions.

Alyssum Digital — Product Designer

Nov 2022 – May 2023 · Remote

- Designed end-to-end digital experiences across web and mobile products, covering discovery, user flows, wireframes, and high-fidelity interfaces.
- Delivered responsive solutions for multiple client projects simultaneously within fast-paced agency timelines.
- Collaborated directly with stakeholders and developers to transform business requirements into production-ready experiences.

G Estudios Multimedia — UI/UX & Branding Designer

May 2022 – Oct 2022 · Remote

- Designed digital products, visual identities, motion graphics, and websites across multiple industries.
- Produced scalable visual systems and implementation-ready assets for client-facing products and marketing initiatives.

Union of Journalists of Cuba — Branding & Motion Designer

Jan 2018 – Jan 2021 · Havana, Cuba

- Led brand identity, editorial design, and motion graphics initiatives for institutional communications and public-facing campaigns.

SKILLS

Design: Product Design · Interaction Design · Information Architecture · User Flows · Wireframing · High-Fidelity Prototyping · Responsive & Mobile-First Design · Accessibility (WCAG)

Design Systems: Tokens (color, type, spacing) · Component Libraries · Design-to-Dev Handoff · Figma Dev Mode · Style Guides & Documentation

AI Workflows: Cursor · Claude (chat + artifacts) · AI-assisted UI generation · Prompt engineering for front-end · AI code review & validation

Front-End (collaborative): React / React Native · Next.js · TypeScript · Tailwind CSS · HTML + CSS · Expo · Webflow

Product: Product Strategy · User Journey Mapping · Cross-functional Collaboration · Agile / Scrum · Design-to-Dev Coordination

TOOLS

Figma · Framer · Cursor · Claude · Vercel · GitHub · Linear · Jira · Webflow

EDUCATION

University of Havana, Cuba — BA Visual Communication Design

Sept 2012 – Jul 2018

LANGUAGES

Spanish: Native · English: B2
